With Interior Motor

Frame Model 900

KEY FEATURES

Interior motor for retrofit applications

PRODUCT PROFILE

Details (Scale: 3" = 1'-0")

SPECIFICATIONS

Light Control Louvers shall be Sunoptics model 900 motorized as manufactured by Sunoptics Skylights, 6201 27th Street, Sacramento Ca. 95822 916/395-4700

Louvers shall be factory assembled, ready for installation.

Louver frame and blades shall be fabricated from 6063-T6 aluminum, finish to be baked on enamel, white in color.

Louver frames shall be mechanically joined at the corners. Blades shall be 6" on center, rotating on a 5/8" rigid PVC bearing. Aluminum end plates shall be fastened to the ends of each blade and act as thrust caps against the PVC bearing. End plates shall be attached to an aluminum bar on 1 side for gang operation.

Standard Louvers shall be electrically operated using Sunoptics standard synchronous 115VAC motor unit. The 60hz, 7 Watt motor shall be integrated to the louver assembly and shall be equipped with limit switches at full open and closed positions drawing 6 amps.

A cycle test was performed on the Sunoptics Louver and successfully taken to over 2,000,000 cycles.
